

**RELIABLE HEARING
IN ANY SITUATION**

PRICE LIST

Effective from 17th March 2026

REXTON

Rexton is one of the leading hearing aid brands in the world. Our mission is to deliver proven hearing technology in the most reliable way. No matter the style, all our hearing aids are powered by proven technology that you can count on, day in and day out. We never stop making improvements to our devices while supporting you with your hearing care journey.

Whatever life throws at you, you can rely on Rexton.

CONTENTS

1) Reach technology	4
2) ReCharge technology	8
3) BiCore technology	10
4) MotionCore technology	16
5) MyCore technology	20
6) TruCore technology	21
7) Essential	22
8) Basic	22
9) Accessories & Apps	23

Terms & Conditions

1. Rexton Hearing Aids carry warranty as indicated in the price list.
2. Kit Includes 2 units of hearing aids and a charger.
3. Accessories (Chargers, miniReceiver, Remote Control, Streamers, CROS / BiCROS) carry 1 year warranty.
4. Power adaptor for some accessories will have to be procured separately.
5. Custom hearing aids prices include shelling charges.
6. HP miniReceiver customization charges are included in the RIC pricing.
7. RIC / BTE instruments will be supplied in standard beige colour. Other colour housing options for RIC / BTE models are subject to a delivery lead time of 3 weeks.
8. Prices of color conversion kit may vary depending on hearing aid model.
9. Hearing Aids are exempted from GST.
10. GST applicable on accessories. Retail prices of accessories are inclusive of GST.
11. The pricing and product specifications are subject to change without prior notice.
12. Chargers for selective models will have to be purchased separately.

Sivantos India recommends all its valued consumers to seek a hearing care professional's opinion on the best suited hearing instrument. Online purchase may not necessarily give you the desired results.

Reach
Custom IIC

Every voice matters, and REXTON Reach makes sure every voice is heard. It's the rechargeable hearing aid with Multi-Voice Focus that enables users to keep track of multiple voices simultaneously, even when there is background noise. And when the user needs to reach out to someone much further away, no problem. Reach connects seamlessly with smartphones.

Features	Description
MULTI-VOICE FOCUS	Multi-Voice Focus* scans the surrounding environment 1000 times per second with four independent focus beams. This enables it to constantly adapt to the changing dynamics of the conversation and make the experience fluid and comfortable. It will boost the prominence of those in the group who are speaking while keeping track of those who are silent, and all without switching between modes or programs, and with no delay.
VOICE STABILIZER	Voice Stabilizer controls the compression to secure that all voices within the focus beam are amplified in the best linear way when the sound gets too loud. It keeps the signal-to-noise ratio positive to help users focusing on the signal with most contrast.
CONNECTIVITY	Reach hearing aids can stream phone calls and audio from iPhone via MFi and Android via ASHA and LE Audio**. When connected via MFi or LE Audio, users can enjoy hands free calls via Headset Mode. With this feature there is no need to hold the phone in your hand for a call. The hearing aids microphones will pick up the users voice so that the user can be on a call without needing to stop what they are doing. While Headset Mode is active, this will enable Call Control and Tap Control. The user can now accept, reject or terminate a phone call via the hearing aid.
LIFEPROOF	Reyton hearing aids are built using robust components and are tested extensively to ensure they can withstand whatever life throws at them. You can rely on them to withstand everyday challenges and harsh environments.
SOUNDPRO 3.0	SoundPro 3.0 automatically steers all sound processing features, including the new Multi-Voice Focus* inputs, based on the analysis of the acoustic scene. When changing the strategy to Natural Focus or Speech Focus, the recommended balance of features is modified. The Balanced Focus is recommended for enhanced automatic performance. * Only for 2-Mic devices and binaural fittings
MFI + ASHA + BLUETOOTH LE AUDIO	Reach hearing aids can stream calls and audio from iPhones and Android phones.
TELECARE	Full remote fitting sessions via Connexx resulting in higher user convenience and satisfaction.
HEADSET MODE	Reyton Reach microphones get the job done so iOS and BT LE Audio users can enjoy hands free call.
MY VOICE 2.0*	General sound and the users own voice are processed separately, but in parallel. In this way we can ensure that the impression of the users own voice stays comfortable while not interfering with the ambient signal processing.
AUTOECHO REDUCER	Automated environment scan to reduce effects of disturbing reverberation on the perceived sound signal.
ATEX	The majority of Reach form factors has ATEX*** certification which verifies that they are tested and approved to be intrinsically safe for use in potentially explosive environments.

* Only available for hearing aids with two microphones in a binaural fitting.

** Please make sure to confirm the compatibility to the users specific phone since the functionality depends on the phone manufacturers enablement.

*** They can be safely used in areas where there may be flammable substances in the air such as paint and chemical manufacturing, petrol stations and mills. The ATEX group/class is printed on the ATEX card, which must be available at hand when the hearing aids are used in explosive atmospheres.

RECHARGE TECHNOLOGY

NEW ENERGY
FOR TIME
TOGETHER

The simplicity and affordability of Rexton ReCharge will have a major impact. New energy for work, hobbies, travel, nights out, for time with the family, and for conversations everywhere. ReCharge is powered by proven technology and hasslefree rechargeability. Just plug in and power up, and everything is ready to go.

Features	Description
AFFORDABILITY	The first rechargeable hearing aid with proven hearing technology in the essential portfolio. The charger is designed for optimal usability and affordability.
RECHARGEABILITY	With a unique performance level offering, you can recharge at home or on the go. Plug in and power up with the handy cable-charger which can recharge one or two hearing aids.
LOCALIZATION	iOmni helps locating the sound source by replicating the natural pinna effect of an outer ear.
DISTORTION FREE	An extended dynamic range of 117 dB SPL is important to secure stable and high-quality sound when listening to music or while in a very noisy environment, keeping the speech clarity.
LIFEPROOF	Rexton hearing aids are built using robust components and are tested extensively to ensure they can withstand whatever life throws at them. They are durable enough to withstand everyday challenges and harsh environments.
ATEX	The majority of ReCharge form factors has ATEX* certification which verifies that they are tested and approved to be intrinsically safe for use in potentially explosive environments.

BICORE TECHNOLOGY

HEARING SHOULDN'T
BE HARD WORK

RELY ON REXTON FOR A SMOOTH
ALL-ROUND HEARING EXPERIENCE

Catching the important word of a colleague, registering the sound of the machinery, the people or the environment in any situation, is at the center of the Rexton BiCore technology. Rexton is reliable and solid listening, even in demanding situations thanks to the breakthrough BiCore Technology getting the job done is what is most important.

There are three special reasons why you can rely on every hearing aid in the range:

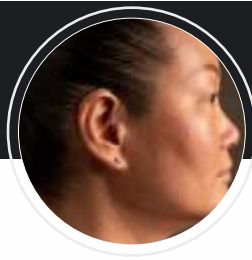

Features	Description
CLEAN SOUND	BiCore uses innovative sound processing to faithfully reconstruct the environmental soundscape for the hearing aid wearer. The robust input stage and new A/D converter reliably handle sounds of all levels without distortion, ensuring that what comes in also goes out the same way, clean and smooth.
RELIABLE TECHNOLOGY	Patented Speech Preservation Technology (SPT) minimizes unwanted noise and preserves speech sound. SPT takes advantage of the spatial separation between target speech sounds and competing noise. This directional analysis allows for separate processing of the speech and noise before they are mixed together. An ultra-quick wireless binaural link ensures left and right hearing aids are always synchronized and react instantly and precisely to changes in the sound environment.
LIFEPROOF	All BiCore hearing aids are Lifeproof with robust construction and proven design. Rexton BiCore hearing aids are tested extensively to ensure they can withstand whatever life throws at them. They are durable enough to withstand everyday challenges and harsh environments. All Rexton products are IP68 certified.
MADE FOR IPHONE AND ANDROID (ASHA)	BiCore hearing aids can stream calls and audio from iPhones and Android phones.*
STREAMING	You may direct stream from your TV and other audio devices using the Smart Transmitter 2.4 or the Smart Mic.
TELECARE	Full remote fitting sessions via Connexx resulting in higher user convenience and satisfaction.
HEADSET MODE TAP CONTROL**	Rexton BiCore microphones get the job done so iOS users can enjoy hands free call.
MY VOICE 2.0**	General sound and own voice processed in parallel for a greater sound impression and user satisfaction.
AUTOECHO REDUCER**	Automated environment scan to reduce effects of disturbing reverberation on the perceived sound signal.
ATEX	Rexton BiCore hearing aids has ATEX certification which verifies that they are tested and approved to be intrinsically safe for use in potentially explosive environments. They can be safely used in areas where there may be flammable substances in the air such as paint and chemical manufacturing, petrol stations and mills. The ATEX group/class is printed on the ATEX card, which must be available at hand when the hearing aids are used in explosive atmospheres. Ask your hearing care professional for your ATEX card***.

* Phones with Bluetooth 5.0+ and Android 10 (or higher) are capable of providing wireless streaming via ASHA, but ASHA must be enabled by each phone manufacturer and service carrier.

** Check performance level compatibility

*** They can be safely used in areas where there may be flammable substances in the air such as paint and chemical manufacturing, petrol stations and mills. The ATEX group/class is printed on the ATEX card, which must be available at hand when the hearing aids are used in explosive atmospheres. Ask your hearing care professional for your ATEX card.

MOTIONCORE TECHNOLOGY

ALWAYS HEAR
WHAT'S IMPORTANT
WITH **M-CORE**

Most hearing aids analyze hearing situations solely on acoustic criteria, then classify them into a small range of predefined acoustic environments. But when people rely on their senses to keep them safe and sound, hearing clearly in every situation is a must especially when they're on the job and moving through the day, where environments can change quickly. Our M-Core hearing aids use proven Motion Core technology that automatically recognizes and adapts to different hearing situations. This ensures users can hear speech clearly and get the most reliable impression of their environment.

UP TO 20 TIMES MORE HEARING SITUATIONS AUTOMATICALLY ADAPTED THAN BEFORE

Features	Description
HIGH RESOLUTION SOUNDPRO	Using a combination of inputs including real-time motion data, signal to noise ratio, and sound directionality, High Resolution Soundpro can continuously adjust the sound settings to provide the most reliable impression of the user's environment, automatically.*
MOTION SENSOR	MotionCore technology features an integrated real-time motion sensor that detects a user's movement, and uses the data to even more accurately determine their sound situation. With this, M-Core hearing aids can automatically detect up to 127 different sound situations.
MY VOICE	The hearing aid recognizes the user's specific voice pattern, and integrates it naturally into what they hear. In turn, this provides the user with a natural-sounding voice that leads to high acceptance rates. And for that the user will communicate more and be more socially active, greatly improving their quality of life
STREAMING	You may direct stream from your TV and other audio devices using the Smart Transmitter 2.4 or the Smart Mic.
TELECARE	Full remote fitting sessions via Connexx resulting in higher user convenience and satisfaction.
REXTON ASSIST	Rexton Assist works on a live, learning network that continuously evolves to provide solutions to any challenge faced by the hearing aid wearer. Rexton Assist brings convenience for both the user and the dispenser, improving the hearing aid performance based on the needs of the wearer, at any time, in any place.

RELY ON REXTON

It's a tough world out there, and even tougher when your hearing starts to go. At Rexton, we won't let hearing loss hold you back. Good hearing is critical: From getting the job done, to getting home safely and being there for the people who count on you, we know what's at stake. That's why we work hard to deliver proven hearing technology in the most reliable way. We understand what reliability means in real life, and make practical, easy-to-use products you can count on. Our hearing aids have been getting the job done since 1955, so whatever life throws at you, you can rely on Rexton.

We believe that nothing hearing related should ever be left to chance, both for the people with hearing loss, and those who depend upon them. We understand their challenges and we meet them with proven hearing technology that is made Lifeproof so it can be counted upon to perform reliably in even the harshest environments. At work, at home, during leisure time, exercise and in all weather, you can always RELY ON REXTON.

**GETTING
THE JOB DONE
SINCE 1955**
