Be Brilliant™

Signia is one of the leading hearing aid brands in the world. Our goal is to enhance human performance through iconic innovations that shape the prescription audio category. We refuse to accept hearing loss as a limitation. It's not about correcting a loss, it's about gaining an edge. Not just performing, but performing brilliantly. Not just hearing again, but hearing better than ever. Hearing every word, beat, and breath.

With Signia, you can Be Brilliant.

Analyze

Processes 192,000 data points every second to identify speakers and analyze conversation dynamics, authentically reflecting real-life conversations.

Augment

Uses data gathered to control multiple focus streams that lock on to and dynamically highlight each speaker's voice amidst the noise. Meanwhile, Augmented Focus technology[2] processes background sound to ensure a comfortable, immersive conversational experience without distractions.

Adapt

Our patented multi-stream architecture updates 1000 times per second, merging multiple focus streams into a dynamic auditory space that adapts to evolving conversations. This allows for real-time tracking and enhancement of multiple moving speakers, ensuring wearers can fully engage in group discussions.

Effortless to use

- **Rechargeability for all**
Your clients can say goodbye to the hassle of small batteries and hello to rechargeability.
- **Wireless fitting**
Cumbersome cables are a thing of the past with wireless technology that streamlines the fitting process.
- **First fit precision**
Our 48 channel first fit calculation, ensures a precise and personalized fit from the start, reducing the need for fine-tuning and optimizing the client experience right from the start.

Elevated design

- **Contemporary design**
With an attractive premium finish, Orion Charge&Go's design is as sophisticated as its technology.
- **IP68 rating**
Certified to resist dust and sweat, Orion Charge&Go provides dependable performance in all conditions.

Enhanced sound processing

- **Clarity in quiet**
Our TruEar technology emulates the effect of the natural ear shape by prioritizing speech frequencies from the front for optimal hearing support in quiet environments.
- **Focus in noise**
Adaptive directionality zeros in on the speech your client wants to hear in noisy environments.
- **Versatility across soundscapes**
Adaptive compression and an extended input dynamic range work in tandem to adjust amplification to the natural flow of sounds, ensuring impeccable sound quality everywhere.

With Sirion Connect, we're once again redefining what's possible in the essentials category, bringing seamless connectivity, exceptional design and advanced technology to more people than ever before.

Effortless to use

- **Connectivity for more**

So more of your clients can stream music.

- **Tailored control**

Your clients can adjust the settings to their needs with the user-friendly Signia app.

- **Wireless fitting**

For a streamlined fitting process without the hassle of cables.

- **First fit precision**

Our 48 channel first fit approach ensures a precise and personalized fit from the start, reducing the need for fine-tuning.

Elevated design

- **Contemporary design**

Sirion Connect combines a premium finish with easy-to-use push buttons.

- **IP68 rating**

Featuring an advanced nanocoating that repels water, Sirion Connect is IP68-certified to resist dust and sweat, even in the most challenging environments.

Enhanced sound processing

- **Split processing**

We are bringing our advanced sound processing technology to the essentials category. By handling speech and background sound separately, split processing makes speech crisp while keeping ambient sounds comfortable. Proven to enhance speech understanding in busy environments, it lets wearers stay engaged with ease.

- **Clarity in quiet**

Split processing technology prioritizes speech frequencies from the front for crystal clear conversations.

- **Focus in noise**

As it gets louder, split processing ensures that background sound is more aggressively reduced while separately ensuring speech is amplified for greater contrast.

- **Versatility across soundscapes**

Split processing stays on, constantly adapting to the environment to ensure speech can always be heard separately from background sounds.
